V. Read and answer the question

WHAT IS YOUR LEARNING STYLE?

If you find yourself learn better by making notes during the lecture, or when the teacher uses a new word, you want to see **it** written immediately, then you are very likely to be a more **visual** learner. You prefer to see the written words. You learn by reading and writing. Visual learners often think in pictures. If you find a particular task or text difficult, look for sources that will suit your learning style, e.g. sources with illustrations, charts, tables, or videos.

If you prefer recording the lecture and listening again to taking notes, or you memorize something by repeating it aloud instead of writing it out several times, you are probably a more **auditory** learner. You prefer to learn by listening and speaking. Auditory learners often learn best from lectures, discussions, by reading aloud, and by listening to audio material.

However, it is probably that you, like most people, learn through a mixture of styles. Sometimes you may prefer to learn by reading, at other time by listening. Ask yourself which is the best style for the particular task you are doing.
